Certifications

Certificate of Completion: Software Engineering Bootcamp   June 2023
FHA Direct Endorsement   Jan. 2022

Project Experience

Professional:

- **Bolt (Automated Underwriting System for UWM)**   Sep. 2021-Feb. 2022
    - Worked alongside developers to construct a user-friendly automated underwriting system
    - Assisted with implementation of key system knowledge through extensive experience with previous underwriting operating systems and underwriting guidance

Personal:

- **Personal Website** (*in progress*):
    - Creating a stylish and dynamic personalized website using React to showcase projects, achievements, experience, and provide a summary of myself and goals
- **Simon Game: Site -** https://c3-pio.github.io/Simon-Game/ **Code -** https://github.com/C3-PIO/Simon-Game
    - Designed a dynamic, fully functional memory game based on the light up Simon game I played as a kid. The game utilizes mainly javascript functionality to exhibit timed intervals, sequence playbacks, a game reset option, and multiple difficulty levels
    - **Technologies:** HTML, CSS, Vanilla JavaScript
- **Music App: Site -** https://music-hl0j35him-c3-pio.vercel.app/ **Code -** https://github.com/C3-PIO/Music-App
    - Developed a fully responsive single page mock music app that utilizes web tokens and Spotify API JSON data to deliver and display personalized album, artist, playlist, and audiobook searches for the user
    - **Technologies**: React, Spotify API, JSX, Bootstrap, JSON

- **To-Do App: Site -** https://to-do-app-lyxw.onrender.com/ **Code -** https://github.com/C3-PIO/ToDoList
& https://github.com/C3-PIO/ToDoListBE
    - Created a full stack to-do list creator that incorporates on the front-end with on the back-end that allows the user to create, track, and delete items on their to-do list
    - **Technologies:** MERN Stack, Axios

Education

Per Scholas, Detroit, MI   Feb. 2023- June 2023
Full Stack Development Bootcamp: 600+ hours of intensive hands-on training in HTML, CSS, JavaScript, Git, and the MERN stack.
    - Developed more than 50 dynamic web applications using front-end technologies such as HTML, CSS, JavaScript, ReactJS, and Redux, as well as back-end technologies such as Node.js, Mongoose, MongoDB, and ExpressJS both individually and as a part of agile teams.
    - Skilled in agile project management, SDLC, OOP best practices, and algorithmic coding challenges

Oakland University, Rochester Hills, MI   April 2016
Bachelor of Science, Health Sciences

Work Experience

Senior Underwriting Team Lead
United Wholesale & Equity Prime Mortgage   Oct. 2017-Dec. 2022
- Managed a team of 12-15 colleagues; assisted with guideline application and understanding, organized meetings for personal and professional growth, and led weekly trainings and projects to improve individual and group performance
- Maintained elite loan quality and production standards for the team and myself to achieve top individual and team rankings within the company each month
- Provided excellent client service to all involved in the loan process: both internally and externally to ensure continued client satisfaction

Key Team Lead: Department Coordinator
Dunhams Athleisure Corporation   July 2014-Oct. 2017
- Led all operations involving receipt of product and product merchandising to ensure practical organization and presentation of the store products
- Performed all tasks related to proper opening of the store: balanced cash drawers, emailed daily sales and hours information, and created schedules for proper coverage
- Consulted with customers to evaluate desired products, assist with questions, and provide recommendations when necessary to achieve elite customer satisfaction
