Education

Per Scholas, Detroit, MI

Feb. 2023 – June 2023

Full Stack Development Bootcamp, 4.0 G.P.A.

Oakland University, Rochester Hills, MI

April 2016

Bachelor of Science, Health Sciences, 3.5 G.P.A.

Certifications

- Higher-level professional certificate in Software Engineering
- Microsoft AZ-900 (in progress)

Skills

- **Programming skills:** HTML, CSS, JavaScript, React, Axios, Bootstrap, MongoDB/Mongoose, Node.js, Express.js, RESTful API's, SQL
- **Technical skills:** OOP, SDLC, Agile management, DOM manipulation, Event & Error handling, Debugging, Version Control (Git)
- **Soft skills:** Time management, Problem-solving, Strong ethics, Creativity, Interpersonal Communication, Microsoft Office

Project Experience

Per Scholas Software Engineering Bootcamp

- 600+ hours of intensive hands-on training in HTML, CSS, JavaScript, Git, and the MERN stack
- Developed 50+ dynamic web apps using front & back-end technologies both individually and as a part of Agile teams.
- Expanded knowledge of Agile project management, SDLC, OOP best practices, and algorithmic coding challenges.

Simon Game: [Code](#)

Description: Designed a dynamic memory game using HTML and CSS based on a light-up Simon game that I played as a kid. The game utilizes HTML/CSS for structure and styling, vanilla JavaScript for logic and interactivity, Audio API for sound playback, and browser events for user interaction handling.

Music App: [Code](#)

Description: Developed a fully responsive single-page mock music app. The app utilizes web tokens and the Spotify API's JSON data to deliver and display personalized album, artist, playlist, and audiobook searches for the user through React, React Router, React Bootstrap, Hooks, Fetch API, and Environment Variables.

To-Do App: [Front-end Code](#) [Back-end Code](#)

Description: Full-stack to-do list creator. The back-end sets up a Node.js server using Express.js, connects to a MongoDB database using Mongoose, sets up middleware for parsing requests and enabling CORS, defines routes for handling API requests, and starts the server to listen for incoming requests on the specified port. The front-end utilizes React, Axios, CSS, Hooks, and a RESTful API to complete the building of a dynamic to-do list application with CRUD functionality.

Work Experience

Key Team Leader

July 2023 – Present

Dunham's Athleisure Corporation

- Led more than 15 product merchandising projects each month to ensure practical organization and presentation of the store.
- Perform all tasks related to business operations start-up each day including balancing cash drawers that value over \$3,500, emailing sales metrics, reporting associate hours information, and creating schedules for proper coverage.
- Consult with customers daily to build consumer relations and drive company sales, leading to a 12% increase in revenue since joining the team.

Mortgage Underwriter (Underwriter II/Senior Underwriter/Team Lead)

Oct. 2017 - Dec. 2022

United Wholesale & Equity Prime Mortgage

- Managed a team of 12 individuals through guideline application and understanding, leading to a 15% increase in efficiency.
- Mentored & trained over 30 underwriting training graduates, overseeing their 2 week onboarding process, and conducting bi-weekly and post completion touchpoints to ensure success.
- Organized more than 50 individualized meetings & weekly training with direct reports, aimed toward developing personal and professional capabilities, leading to 5 members of my team receiving a promotion during tenure.
